PROJECT DESCRIPTION: Norcraft has applied for a permit to modify the Norcraft facility in Lynchburg, Virginia. The facility is a manufacturer of wooden kitchen and bath cabinetry. The proposed permit would allow the addition of two spray booths and one natural gas fired oven.

The proposed facility is classified as major source of air pollution. The maximum annual emissions of air pollutants from the facility under the proposed permit are not changing from the current permit limits of 230 tons per year of VOC and 13.2 tons per year of particulate matter. Dry filters are used to control particulate matter. High-solids coatings, air assisted airless and High Volume Low Pressure (HVLP) spray guns are used to control VOC. Norcraft does not expect an increase in emissions of any pollutant based on this project.
